

DESIGN your *dream* sofa

with the very best of everything for your individualised comfort and style!

LEATHER
HOUSE + HOME

The best top grain Italian and New Zealand aniline leathers. The best ethically sourced/reclaimed Jarrah solid hardwood inner frames. The best premium quality Australian made inner foams and premium 304-grade stainless steel legs and trims but to name a few. All expertly crafted right here in Western Australia to your specification for best ergonomics.

At Leather House + Home, we work with you to **bring your dream sofa to reality.**

LEATHER OR FABRIC?

Italian and New Zealand cowhide leather is not only stylish, but also comfortable and durable. Choose from a range of premium quality pure leather or world class fabrics based on what's most suited to your individual use & style.

SEAT DEPTH

Seat depth is fully customisable to suit individual ergonomics.

BACK COMFORT/LUMBER SUPPORT

To truly relax, your seating must have the right amount of support and cushion. Soft sofas facilitate slouching, which over time can negatively impact on your wellbeing. Firmer back support encourages upright posture in a more comfortable and stable position.

SEAT HEIGHT

Seat height customisable to suit individual ergonomics.

CUSHION FIRMNESS

Regardless of your age, health or flexibility, sinking into a cushy sofa or chair pulls down on your spine and pelvis, causing strain. Moreover, this is exacerbated by the effort required to get in and out of the pillowy abyss. While you may not feel it immediately, day-in and day out, it can prove injurious.

Firmer cushioning is recommended for more ergonomic, supportive seating.

SOLID HARDWOOD INNER FRAME

Ethically sourced kiln-dried Jarrah and other Australian native hardwoods provide a strong and robust skeleton to keep every part of the sofa together. Our frames are expertly constructed in WA and are screwed together and can stand up to regular use without compromising on comfort.

LAYERED HIGH DENSITY FOAM

Our cushions are made with high-density Australian made foam for superior comfort.

ARMREST

Armrests are customisable to suit individual ergonomics. The shape and height of the arms have a significant impact on overall style and comfort.

LEGS - STEEL/TIMBER
